## (54) PREPARATION FOR EXTERNAL USE FOR SKIN

(57) Abstract:

PROBLEM TO BE SOLVED: To obtain a preparation for external use for skin which lasts and stabilizes the effect of salicyclic acid and gives no irritation to the skin.

SOLUTION: This preparation is obtained by allowing the impalpable powder-like organic resin with a volume cumulative average particle diameter of 50  $\mu\text{m}$  or less

or less to hold 0.1-30 wt.% of salicyclic acid and glycyrrhetic acid and/or glycyrrhinitic acid. The impalpable powder-like organic resin with a volume cumulative average particle diameter of 50  $\mu\text{m}$  or less is selected from the group consisting of polyethylene, nylon, polypropylene, polymethyl methacrylate, polybutylene terephthalate, polyethylene terephthalate, polytrimethylene terephthalate, polyethylene isophthalate, polyester polyphenylene sulfide, polyethylene naphthalate, polyallylate, polycarbonate, polystyrene, cellulose and silicone.
